What right do you Judges have making changes in the law and deny and deprive of our right to trial by jury. You are making laws disguised as court rule. The judges of the state Supreme Court under the Michigan Constitution as well U.S. Constitution make it clear that Judges are not to make the law but to interpret the law. It seems that Michigan Supreme Court are being used by big business & asbestos industry to change the law. It seems that some law firms feel free to try to take the working man rights out of court and away from juries.
